Application	Ratio of Dilution	Instructions
Garage / Driveway / Shop	Full Concentrate - 1:1 (no dilution)	Clean excess oil from surface, Spray Oil Lift [®] onto spilled oil/grease, Wait for at least 5 – 15 minutes. Keep area wet with water while area is soaking. Scrub affected areas, hose with water Mop spent oil/water & rinse. Throw waste water on grass or gravel. Caution: asphalt may have been damaged by oil spill-gentle cleaning
Vehicle	Engine, Wheels, Carpet - 1:3	Pollution build-up on vehicles requires constant maintenance. Alkaline and caustic cleaners attack the car finish. As well, detergents produce limited results. Oil Lift separates the oil and suspends the dirt without damaging the surface
Vehicle	Windows - 1:20	Spray on surface and wipe clean
Vehicle	Tools - 1:5	Spray on surface and wipe clean, allow the solution to do the work..
Boats (Deck and Bilges) / RV	1:3 up to 1:15	Spray area to be cleaned, Wait for 5 – 10 minutes, brush Lightly, Hose with water
Household	1:10	Oil Lift can be used to replace other general purpose cleaners around the home – windows, walls, cupboards, bath tubs, sinks, grout, etc – safely and without damage to the environment when flushed down the drain – and without smearing or leaving a residue. Simply spray on diluted Oil Lift and wipe.
Floors in General	1:4 (initial clean) 1:10 to 1:20 thereafter	After a first deep cleaning at a dilution of 1 to 4, dilution can be increased for subsequent applications.
Bathrooms (Faucet / Walls)	1:5	Best to spray when showering is done – steam softens wax residue left by soaps & shampoos, Wait for 10 minutes, scrub and rinse.
Tubs	1:5	
Tile Backsplash	1:5	
Kitchen	(full strength) to 1:6	<p style="text-align: center;"> Tiles and Counter Top Tiles – (Full Strength Up to 1: 6) Spray area to be cleaned, Wait for 10 – 15 minutes, Lightly brush (especially grout) Wipe with wet towel/rag - Exhaust Vent, Hood & Filter, Stove Top, Grille – Full strength up to 1: 3 (Spray area to be cleaned, Wait for 10 – 15 minutes, Scrub brush under tepid running water Stickiness due to grease and oil is eliminated completely) - Oven, Barbeque Grille – Full strength up to 1: 3 (Spray area to be cleaned, Wait for 10 – 15 minutes, For baked grease or oil, use scrub brush) - Corning Wares, Pots & Pans, Baking Tin, Steamer Basket – Full Strength up to 1: 3 (Spray directly or “soak”, Wait for 10 – 15 minutes Scrub affected surfaces, Rinse with tepid water) = Faucet, Sink –1 : 5 (Spray area to be cleaned. Light scrub brush Wipe with wet towel/rag) </p>
Carpets	Stain Removal & Steam Cleaning – 1 : 5 parts water	Spray heavily affected area, gently brush with brush, Wipe with absorbent cloth
Venetian Blinds	1:10	Spray directly, Wait for 2 minutes Wipe with damp/moist absorbent cloth
Clothes	Add 50ml to 1 full load	Even delicate ones to remove oil based stains NOTE: Do not use with Laundry Soap
Linens	Stain Removal – Full Strength Laundry in General – 1 cup to 1 full load	Spray affected area, Wait for 10 minutes Wash regularly Note: There may be some stains that it cannot remove like mustard
Fireplace Glass Door	1:5	Spray glass, Wait for 15 minutes Wipe with paper towel
Tennis Shoes	1:5	Spray dirty running shoes, Scrub brush Rinse/wipe with dry cloth
Computer	1:20	Use Oil Lift like regular cleaners
Home Appliances	1:20	Use Oil Lift like regular cleaners
Pre-Paint Surface Prep	1:5	Spray areas to paint Wipe with damp/moist absorbent cloth
Wall Paper Removal	1:10	Spray wall paper Watch as paper peels off from wall
